1. Ing. Diesing (fnu) has been appointed the new production manager for total production (Gesamtbereich) at the Werk fuer Fernmeldewesen HF (OSW), Berlin-Oberschoeneweide. Diesing was formerly the director of Roehrenwerk Neuhaus in Thuringia, formerly a Telefunken plant. Although he is a member of the SED, he has had difficulties with the party and as a result was relieved of his position at Neuhaus. He then went to RFT-Leipzig and later was given the job of setting up the radio plant in Muehlhausen in Thuringia, where the Phonetika firm moved in after leaving Berlin-Weissensee. Diesing was supposed to become the technical director of the Muehlhausen plant, but his appointment was not confirmed by the SED.
2. At present OSW is working on an order for 70,000 ECH 81 tubes per month. Besides these, an unusually large number of tubes of the Al 5 and 6 AG 5 type are being produced. It has been extremely difficult to meet production quotas because wire for coils (Wendeln) is in short supply.
3. The Russian acceptance official for annealed valves (Gluehventile) at the HF plant is Romayev or Romayov (fnu).
